

TROJAN BATTERIES POWER BANKS- YEMEN

SABA ISLAMIC BANK- 192V|100AH

Due to the rapidly increasing power disruptions, Saba Islamic Bank has an emergency generator. The generator takes few seconds to start. To prevent the servers from being shut down while the generator is starting, a power bank was installed. The Power Bank was connected to a 10 KVA inverter used as an emergency backup system for the bank's servers.

Project

Location Darsaad, Aden, Yemen

Commissioning 2017
